

Where do you like to study?

My preference is definitely the library owing to the silent yet intense atmosphere. I am most motivated when I see others around me are working hard.

However, my friends **disagree** because they enjoy the convenience of studying at home. But for me, I really can't resist the **temptation** of my bed when I am at home so I prefer studying in the library.

What are your plans for the future?

Everything is **up in the air**, and I'm happy to keep options open. I don't want to put all my eggs in one basket so I'm still considering both the tracks of being a doctor or a lawyer.

What do you do in that job?

Apart from my main responsibility, which is to teach, I also have to **handle** school administration, correct students' homework and address questions and concerns from parents. Although teaching seems like an easy job, in fact going to class is just the **tip of the iceberg**.
