

### **FORMULA 13: How would you improve X?**

*How would you improve your apartment?*

*If you could, how would you improve your school/ workplace?*

- 1. Identify problems with X.**
- 2. Talk about you would do to solve them/ make them better.**
- 3. Say what the positive results of these changes would be.**

#### **How would you improve your apartment?**

To start with, the place I'm living in now is quite small and crowded. I have too much stuff, and it makes it hard to keep track of things, and makes everything look messy and very cramped. There's also very little light in my flat. So, firstly, I would make more space by getting rid of some of my things. Then, I would have the windows made bigger and lighter curtains made and fitted. Then my flat would then much cosier.

#### **How would you improve your university to make it better?**

My school campus is quite scruffy and run-down. I suggest the authorities improve it by spending more money on up-keeping the grounds and modernizing the classrooms. If I were in authority I would have new classrooms built, I would have the sports facilities repaired, and I would hire more caretakers. Having a more modern campus would make life more pleasant for us and the place more appealing to visitors.

#### **Practice:**

1. How would you change the education in your country to make it better?
2. How would you improve your home?
