

### **FORMULA 15: What do you want/ hope to do (in the future)?**

*Is there a country you hope to travel to one day?*

*What do you want to do when you finish university?*

*What kind of job would like to do when you finish your studies?*

1. Say what ambition for the future is.
2. Say why you want to achieve it.
3. Say how you hope to achieve it.

#### **What do you want to do when you finish university?**

What I really hope to do is to become a Non-Government Organization (NGO) here in my country. I would like to find a purpose in life- I don't want to just worry about success and making money like a lot of people nowadays. I think it would be so rewarding and challenging to work as a doctor. If I work really hard and save up enough money then I will go to Europe and get a master degree.

#### **Tell me about your future ambitions.**

What I'd really like to do in the future is pretty simple: I'd like to find a good job, which will hopefully lead to a stable career, get married to a lovely girl and start a family. I hope to be able to afford a nice apartment to bring up our children. I think this would give me a great sense of pleasure and security. If I strive hard I think I can achieve this in less than 10 years.
