

# Counterargument (n.)

## 駁論

Specialising in limited areas of interest early does not necessarily reap positive effects – the **counterargument** is that exploring a topic in great depth when still young established the foundation for expertise.

此詞可能解讀為「反方論點」更準確。顧名思義，經常被用來說明另一方的說法。Counter，就是「反」的意思。Counter-terrorism / counterterrorism 就是反恐。

---

# Counterpart (n.)

## 對手

If students are first equipped with different types of skills before embarking on a specialized journey in university, I am confident that they will be more likely to outperform their **counterparts** in their future workplace.

此詞可能解讀為「對家跟你同等 level 的人」更準確。

---

# Comprehensive (adj.)

## 全面

In terms of providing a **comprehensive** learning experience, high school is an ideal platform where students gain rudimentary knowledge on an array of subjects.

這個詞極度基本，但又可以 show off，必須要懂用。
